MORCRYPTO

MORCRYPTO

TRADING EXCHANGE

GAMING PLATFORM

INTRODUCTION

A multifaceted investment company with a platform that provides P2P trading exchange, AI trading system, crypto mining services, crypto compatible e-commerce platform, multi-gaming crypto-based platform and many investment opportunities as well.

MorCrypto Nigeria Limited is a duly registered microfinance bank in Nigeria with RC. No. 1660409, also legally represented by lexfuturus.io (a global boutique blockchain law firm with DLT/blockchain lawyers from across jurisdictions), and partners with FMW Media Works(Broadcasted of Nasdaq, Fox, Bloomberg etc).

MorCrypto's biggest goal & vision is to be the pioneer of every blockchain based innovation in Africa and to deliver new technological products to further strengthen and encourage blockchain and cryptocurrency adoption in the African continent . We are also bringing a game changer to the cryptocurrency trading space, we call it the "MOR Engine". An AI trading system to give efficiency to expert traders and assist new traders to find trading profitable. We believe this will encourage crypto trading and drive adoption through killing the fear of losing in crypto trading.

MORCRYPTO

TRADING EXCHANGE

As part of our blockchain and cryptocurrency adoption vision, we are launching our P2P cryptocurrency trading exchange to cater for the cryptocurrency transactional needs of numerous Nigerian and African traders. As our goal is to connect the global blockchain and cryptocurrency industry to Africa, we have started our community with traders, blockchain and cryptocurrency enthusiasts from around the world.

The exchange is also expected to serve the Diaspora Africans who move billions of dollars down to Africa yearly. The exchange is planned to compete favourably in the present crowded cryptocurrency exchange industry with very low trading, withdrawal and transfer fees, exceptional customer service and user friendly trading interface.

MORCRYPTO

E-COMMERCE PLATFORM

The e-commerce industry is a multi billion dollars sector and the blockchain is the new internet while cryptocurrency is the new money, so we have decided to merge all this on our platform and stay ahead in Africa by providing a platform that can help make online shopping a delightful experience.

History was made when about 1billion dollars was transferred on the blockchain with a fee of \$0.68, yes, transactions can be inexpensive. On our e-commerce platform, shopping will equal saving, goods will be priced and sold at market rates; meaning you can buy for less is there's a green candle.

Users will be able to budget shopping funds and store them on the platform, then segment the funds in a shopping inventory to help them know what and when to buy accordingly.

MORCRYPTO

MOR ENGINE (AI ENABLED TRADING)

Research shows that an average income earner is very sceptical about dabbling into cryptocurrency trading, simply because they are novices and wouldn't want to lose their funds in a terrain they are not used to. The launching of our AI system which we have called "MOR Engine" is not just targeted at novice traders but experienced ones as well, to improve on trade efficiency and profitability.

Features like looping buy and sell options in percentage and figures, arbitrage notification and trading (manual & automatic) and so many others which will be unlocked with MOR tokens are some that will be found on the AI system.

Since we are aiming at being at the forefront of blockchain and cryptocurrency adoption in Africa, we believe that this system will encourage more novice traders including experts within the African region to pick interest and become enthusiasts.

GAMING PLATFORM

The gaming industry is experiencing exponential boom on the blockchain, with hundreds of Dapps being released yearly on different blockchains which has really affected the overall cryptocurrency market cap positively.

Our gaming platform will be combination of two or more players games, a betting deck with crypto exchange functionalities. Users will be able to deposit funds and withdraw wins automatically. Users will also be able to compete internationally and play games live online while the entire users of the app can watch as an audience. On the staking deck, 5% of every win will be deducted for maintenance, marketing and promotional activities.

Cryptocurrencies won in games or giveaways can be immediately swapped to fiat and withdrawn into local bank accounts. There will also be a chat box to enable users interact, connect and socialize to set up competitions between themselves. We will make our gaming platform as child friendly as possible with mind and educating games specially created for children.

MINING FARM

There are several profitable mining cryptocurrencies now available, and thought of a way to increase the value of holding MOR; then we came up with the idea of sharing a percentage of the revenue generated through our mining to everyone who holds MOR token.

Our mining farm which is planned to be the biggest in Africa owned a company, is structured to run on uninterrupted green power supply. The facility will house hundreds of miners which will be upgraded in quantity and quality as we keep going through halving phases on the blockchains.

The other percentage will be shared across development of other projects owned by MorCrypto Limited, marketing and building of our bank.

MORCRYPTO BANK

Information available to us through our legal partners who are in fact spearheading the legislation and regulation of cryptocurrency in Nigeria keeps us ahead of every other project. We are aware of the sharp changes occurring in the background with regards to cryptocurrency regulations in Nigeria and as a microfinance bank duly registered with a running and operational cryptocurrency exchange, we will be at the forefront when the government is ready and we will be compliant based on the information made available to us by our legal team.

MorCrypto bank will be the first bank in Nigeria to own a cryptocurrency exchange and carry out fiat/cryptocurrency transactions nationally.

We choose to launch our cryptocurrency exchange first so as to reach out to the global market while opening the bank later to connect the globe with Africa in a thriving ecosystem.

We believe this will be revolutionary as our transaction fees will compete favourably with that of the traditional banking system. We will also have a credit/debit Master card to enable our users carry out transactions on local ATMs.

MOR TOKENOMICS

MOR TOKEN STATISTICS

TOTAL SUPPLY OF MOR TOKEN = 1,000,000,000

CIRCULATING SUPPLY: 1,000,000,000

GENESIS DATE = 30 AUGUST, 2019.

PRE-SALE: 22,222,222 – 2.2%

IEO START PRICE = \$0.005 AND \$0.006 (FIRST & SECOND ROUNDS RESPECTIVELY).

BREAKDOWN OF CIRCULATING SUPPLY:

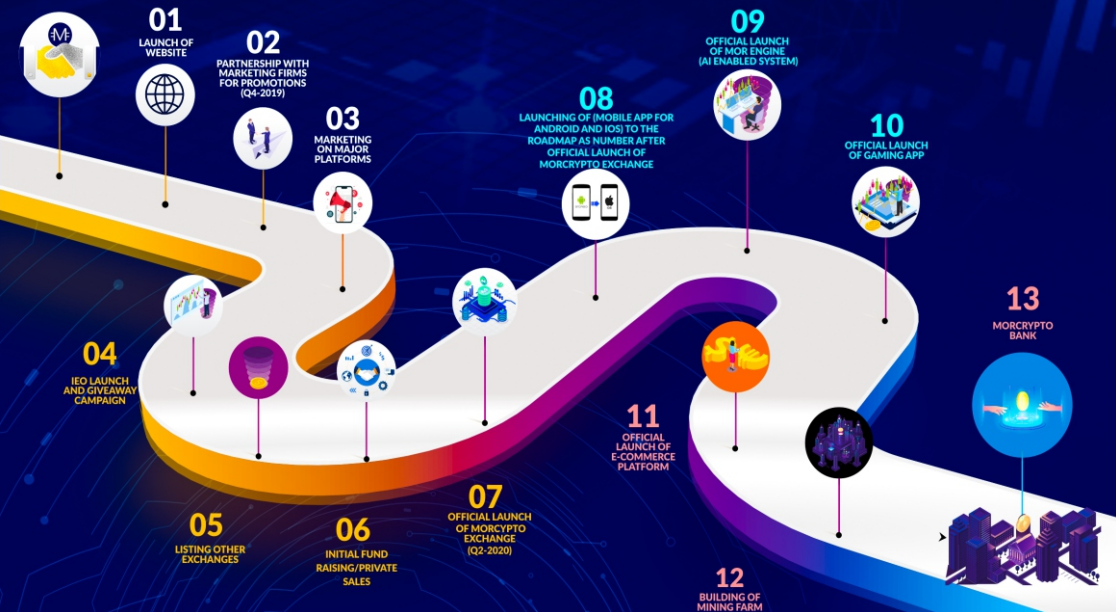

PURPOSE	AMOUNT OF MOR.	TOTAL SUPPLY PERCENTAGE (%)
ECOSYSTEM RESERVE (LOCKED)	500,000,000	50%
PRESALE PRICE	22,222,222	2.2%
IEO SALES	300,000,000	30%
MARKETING	40,500,000	4.05%
DEVELOPMENT	35,000,000	3.5%
TEAM	100,500,000	10.05%
AIRDROP	2,000,000	0.2%

MOR tokens will be burnt to reduce the total supply during the MorCrypto blockchain development, deployment and subsequent swap. The total supply at the time of swap will be determined by our products, token demand, price and circulation.

Ecosystem Reserve tokens are locked forever, except there funding needs arising from the marketing and development departments.

ROAD MAP

MORCRYPTO

MOR TOKEN ECOSYSTEM REVENUE

Because the whole idea behind our project is to encourage crypto adoption, help investor profit in crypto and provide a more crypto friendly marketplace. The **'HOW'** question keeps popping up and here we want to take some time and demystify the myth that such a system is not sustainable.

In our project roadmap, we have series of bullet points for each phase and quarter which will ensure the sustainability of our ecosystem. First of all we will have an exchange that will list coins with payments received in their project tokens or coins, our e-commerce platform will be a market place not just for crypto hardware and software products but we will partner with some of the e-commerce giants and manufacturers so that their products can be sold for MOR TOKEN on our marketplace.

Morcrypto Exchange trading fees (both in MOR Token and other project assets), other forms of revenues including Initial Exchange Offerings (IEO), advertisement placements (both on the exchange and marketplace) and profits from sales of goods will be used in sustaining the investment portfolio system.
